

# ANTHONY NNANNA

FULL-STACK DEVELOPER · [Portfolio Site](#) | [anthonymnannac@gmail.com](mailto:anthonymnannac@gmail.com) | [GitHub](#)

## PROFESSIONAL SUMMARY

Senior Full-Stack Developer (Laravel + Vue) with 5+ years of experience building scalable, high-performance web applications. Strong focus on architecture, API design, database optimization, testing (TDD), and system performance. Proven ability to lead teams and deliver enterprise-grade platforms end-to-end.

## SKILLS

- **Languages:** PHP, HTML5, CSS3, JavaScript (ES6+), TypeScript, SQL
- **Frontend Frameworks/Libraries:** Vue.js, NUXT, Tailwind CSS, Inertia
- **Backend Frameworks/Technologies:** Laravel, RESTful APIs, GraphQL
- **Databases & Caching:** MySQL, PostgreSQL, Redis, MongoDB, SQLite
- **DevOps & Deployment:** Docker, Forge/Envoyer, CI/CD
- **Testing & Quality:** PHPUnit, Pest, TDD
- **Architecture & Design Patterns:** Event-driven systems, queues, API design, multi-tenancy
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket

## PROFESSIONAL EXPERIENCE

### Full-Stack Web Developer | Sourcedware | Amsterdam, NL | March 2022 - Present

- Built scalable Laravel + Vue applications with real-time features, reducing response times by 40%.
- Architected MySQL/PostgreSQL databases with Redis caching for high-availability systems.
- Introduced TDD (PHPUnit/Pest), improving reliability and reducing bugs by 30%.
- Implemented security + performance optimizations for high-traffic platforms.
- Led and mentored a team of 5 developers, improving workflow efficiency.

### Full-Stack Web Developer | Gigabyte Developers | Rotterdam, NL | March 2019 - Dec 2021

- Developed high-performance Vue/Nuxt + Laravel applications with SPA-level responsiveness.
- Built reusable Blade/Vue components and implemented Inertia.js to simplify client-side routing.
- Managed Docker, Forge, and CI/CD deployments for stable, zero-downtime releases.
- Optimized database queries and Redis caching, improving application speed by 25%.
- Delivered pixel-accurate, mobile-first interfaces in collaboration with UI/UX teams.

## PROJECTS

### TruvoTrade · Hedge Fund Platform · Lead Architect & Full-Stack Engineer

**Technologies:** *Laravel · Vue.js · Tailwind CSS · MySQL · Redis · WebSockets · Docker*

- Designed platform architecture, payout engine, and real-time dashboards.
- Built event-driven API workflows with Redis caching for sub-300ms updates.
- Improved operational efficiency 20% and reduced payout cycle time 40%.

### Ruul - Multi-Tenant Portfolio & Digital Assets Marketplace · Senior Full-Stack Engineer

**Technologies:** *Laravel · Vue.js · Elasticsearch · MySQL · Redis · Docker · GitHub Actions*

- Engineered multi-tenant infrastructure with automated tenant provisioning.
- Implemented Elasticsearch + Redis for high-speed catalog search and filtering.
- Built resilient background workers for checkout and order processing, reducing failures to <0.5%.

### Koinpark - Crypto Trading Metrics & Operations Dashboard · Full-Stack Lead

**Technologies:** *Vue.js · Tailwind CSS · Laravel · WebSockets · Prometheus · Grafana*

- Built a real-time SPA for monitoring orderbooks, P2P metrics, and system health.
- Integrated observability stack to track performance and anomalies.
- Reduced MTTD by 60% and sped up incident resolution by 45%.

## EDUCATION

### Bachelor of Technology in Computer Science

Delft University of Technology, Netherlands | Graduated: 2019

## CERTIFICATIONS

- Laravel Certification – Laravel Academy
- Vue.js Mastery – Vue School
- AWS Certified Developer – Associate Level

## ADDITIONAL INFORMATION / ACHIEVEMENTS

- Open-source contributor (Laravel & Vue ecosystem)
- Speaker at regional PHP/Laravel events
- Published technical articles on Laravel optimization, API architecture, and Vue best practices
