

ANTHONY NNANNA

Fullstack Software Developer | Technical Lead

anthonymnannac@gmail.com | github.com/chiefJurist | linkedin.com/in/anthony-nnanna-966663392/

PROFESSIONAL SUMMARY

Full Stack Software Developer and Technical Lead with 7+ years of experience building and scaling web and mobile applications, leading engineering teams, architecting end-to-end systems and driving technical decisions across production platforms. Delivered measurable business impact through performance optimization and strategic feature development using expertise in PHP, Laravel, Node.js, React, Vue.js and AWS.

TECHNICAL SKILLS

Backend: PHP, Laravel, Node.js, REST APIs, OAuth, WebSockets.

Frontend: Vue.js 3, React, React Native, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3.

Database & Caching: MySQL, PostgreSQL, MongoDB, SQLite, Redis, Query Optimisation.

DevOps: AWS, Docker, CI/CD, Git, GitHub Actions, Linux CLI, Nginx, Apache.

Testing: PHPUnit, Pest, Playwright, Vitest, Laravel Dusk, Postman, Insomnia.

Practices: Agile, TDD, SOLID principles, DRY, Design Patterns, Microservices, Code Review.

PROFESSIONAL EXPERIENCE

Senior Web Developer · Jars Of Glory NGO

August 2023 - Present, Florida, USA (Ongoing Contract)

- Built headless WordPress platform with Vue.js and TypeScript frontend enabling non-technical content management.
- Implemented Stripe donation system with 500+ transactions, \$120K+ raised and 65% increase in online giving.
- Developed event registration platform managing 21+ charity events and reducing coordination time 70%.
- Optimized site performance from Lighthouse 48 to 94, page speed 4.2s to 2.8s, and improved donation completion 48%.
- Maintain the platform with 100% uptime through ongoing updates, bug fixes and feature enhancements.

Senior Full Stack Developer · Sourcedware

July 2023 - May 2026, Remote

- Architected and delivered 15+ production applications across Laravel, React, Vue, Node.js on AWS and VPS environments.
- Led technical decisions on architecture and standards, reducing production bugs 40% through code review processes.
- Maintained 20+ production apps with 100% average uptime and 35% improvement in mean time to recovery.
- Optimized 8+ applications with an average of 40% faster API response times and 50% reduced database load via query optimization and Redis caching.
- Managed Redis-based message queues and asynchronous job processing, ensuring reliable background task execution across 15+ applications
- Mentored 3 junior developers with 2 promoted to mid-level roles and implemented CI/CD pipelines reducing deployment time from 45 minutes to less than 8 minutes.

Junior / Mid Full Stack Developer · Gigabyte Developers

September 2019 - June 2023, Remote

- Built 11+ production websites and applications with 100% delivery rate and a perfect client satisfaction score.
- Progressed from Intern to Mid-Level Developer managing 3 to 4 concurrent projects independently.
- Mastered PHP, Laravel, Node.js, Vue.js, React, RDBMS, CI/CD and TypeScript across 20+ client projects.
- Optimized 5 legacy applications reducing load times through query optimization and caching.

NOTABLE PROJECTS

Limit-Order Exchange Engine – [github.com/chiefJurist/virgosoft-exchange-engine]

Tech Stack: Laravel, Vue.js 3, MySQL, Redis, Pusher

- Built real-time trading engine processing billions of orders with sub-100ms latency in 48 hours using Redis queues for asynchronous order processing.
- Implemented atomic transaction logic preventing race conditions with zero financial discrepancies across billions of trades.
- Developed price-matching algorithm with automatic 1.5% commission calculation for buy and sell orders.
- Integrated Pusher for real-time order-match events with instant UI updates to both trading parties.

TruvoTrade – [github.com/chiefJurist/TruvoTrade]

Tech Stack: Laravel, Blade, MySQL, Tailwind

- Built hedge fund investment platform from scratch using Laravel MVC architecture with core financial features for deposit flows, interest calculations, and withdrawal processing.
- Managed \$300k+ in user assets with complex financial calculations and secure data handling.
- Implemented responsive design using Blade templating and Tailwind CSS for non-technical investor users.

PromptEdit - Marketplace Landing Page Redesign – [prompt-edit-eta.vercel.app]

Tech Stack: Vue.js, Tailwind

- Designed and built marketplace landing page using design-first Vue.js and Tailwind without Figma handoff.
- Benchmarked against Figma, Adobe Express, and Canva to optimize visual hierarchy, layout, and mobile responsiveness.
- Optimized visual hierarchy, layout, and mobile responsiveness for creative tools marketplace.

EDUCATION

B.Sc. Computer Science · Federal University of Technology Owerri

2017 - 2022

ADDITIONAL INFORMATION

Languages: English (fluent), Spanish (conversational).
